

Are you a serving or ex cabin crew / flight attendant, feeling sick and chronically tired, especially after flights? Then link up with others with the same or similar problems on **AEROTOXIC ANGELS** Face book page to find:

- Company from like minded “Angels” with un-diagnosed health issues
- Natural Health Solutions
- Help for close to every question or issue you may have
- Advice

Launched on 9th October 2011 – **AEROTOXIC ANGELS** is only as good as the people in it – so join the community today & pass it on to at least one other potential Angel or more and lets as a strong group help solve the aerotoxic issue - permanently!

Why “Angels”? Because as cabin crew you are there for everybody, doing things for everybody all the time you are host/ess, cook, nurse, baby sitter, bar tender, night watch wo/men, butler, and what nobody ever seems to remember: on guard for safety and security!

Practically all airlines have “wings” brooches on their uniforms and everybody’s workplace is the skies.....and the “Aerotoxic”? That’s the toxic chemicals you all are exposed to in your workplace (Pesticides, TCP’s etc) – many of you have mild to severe health issues due to this – do you know?

So instead of creating a “John’s Angels Health Force” (aka Charlie’s Angels), we chose

[AEROTOXIC ANGELS](#). It’s FREE.....it’s informative, it’s up to date and it’s fun! Join us now! Read the Notes, Info’s and comments and share!

Thank you and we look forward to seeing you there.

John Hoyte

Chairman [Aerotoxic Association](#), former BAe 146 Training Captain

Contact person for **AEROTOXIC ANGELS** is Bea Ni Goibniu, former A320/ A319/B737
